

Installation and Configuration of Ansible

1. The Course Overview
2. Ansible Requirements – Python, PIP, and Virtual Environments
3. Ansible Course Environment Setup
4. Ansible on Microsoft Windows
5. Ansible on Mac OS X
6. Ansible on Linux
7. Validating Ansible Installation

Ansible Architecture and Design

8. Ansible Inventories
9. Ansible Modules
10. YAML
11. Ansible Playbooks, Breakdown of Sections
12. Ansible Playbooks, Variables
13. Ansible Playbooks, Facts
14. Templating with Jinja2
15. Ansible Playbooks, Creating, and Executing

Ansible Playbooks, Advanced Topics

16. Ansible Playbook Modules
17. Dynamic Inventories
18. register and when
19. Looping
20. Asynchronous and Parallel
21. Task Delegation
22. Magic Variables

- 23. Blocks
- 24. Using the Ansible Vault
- 25. Creating Custom Modules
- 26. Creating Plugins

Structuring Ansible Playbooks

- 27. Using Includes and Imports

- 28. Using Tags

- 29. Using Roles

Using Ansible with Cloud Services and Containers

- 30. AWS with Ansible

- 31. Docker Support with Ansible

Other Ansible Resources and Areas

- 32. Troubleshooting Ansible

- 33. Validating Testing with Ansible

- 34. Best Practices with Ansible

- 35. Upgrading Ansible
